

NEW PRODUCT BULLETIN

Swing Clamp Cylinders *featuring...*

“SC” Series

- **Magnetic Piston**
 - **Clamp arm with adjusting bolt**
 - **Four rod end flats for clamp arm positioning**
- all included as standard at no extra charge!**

The clamp arm rotates 90° as it extends away from the workpiece providing clearance and access for unload/load operations. Double acting operation and standard magnetic piston offer positive cycles, durability and workpiece detection features. Extruded aluminum body mounts directly and rigidly to equipment surfaces in a minimum of space.

Operation cycle:

- 1) Clamp arm extends (straight line) as it releases clamp load from workpiece.
- 2) Arm rotates 90° to full extend position.
- 3) When retracting, clamp arm swings 90°:
Model Code R = clockwise direction,
Model Code L = counterclockwise rotation.
- 4) With clamp arm in position over the workpiece, it follows a straight line path to apply clamping force.

Specifications

Action	Double Acting, Magnetic Piston							
Bore Size (mm)	12	16	20	25	32	40	50	63
Max. Moment (ft-lbs*)	0.73	2.8	5.1	9.5	19.9	34.6	78.9	134.2
Swing Stroke (mm)	7.5	7.5	10	10	13	13	18	18
Straight Stroke (mm)	10, 20						20, 50	
Direction of Swing	R-Clockwise; L-Counter Clockwise							
Angle of Swing	90° ± 10°							
Theoretical Clamping Force (lbs)	See chart on page 2							
Operating Media	Compressed Air or Petroleum Based Hydraulic Fluid							
Max. Operating Pressure	145 psi (10 bar) - See “Precautions”							
Piston Speed	50 to 100 mm/sec							
Temperature Range	-10° to + 70°C (+14° to 158°F)							
Lubrication	Air line lubrication recommended							

* Max. bending moment allowed when retracting

Weights (lbs)

Straight Stroke	Model							
	SC12	SC16	SC20	SC25	SC32	SC40	SC50	SC63
10	0.15	0.22	0.55	0.62	1.10	1.31	-	-
20	0.19	0.27	0.64	0.71	1.16	1.41	2.42	3.35
50	-	-	-	-	-	-	2.98	3.98

How to Order

- 1) Specify **“SC”**
- 2) Specify the bore
- 3) Specify the straight stroke
- 4) Specify direction of swing

Note:

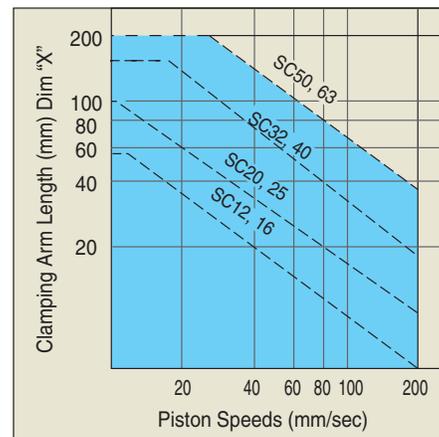

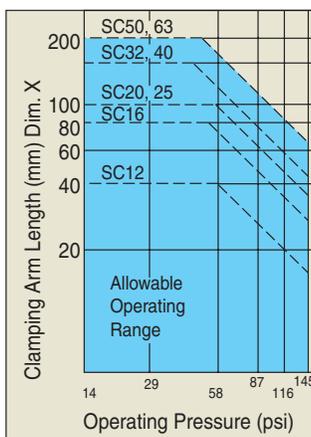

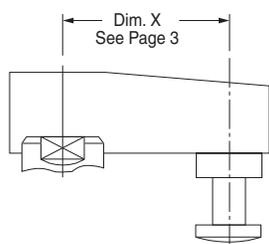

- a) Please order sensors separately from page 4.
- b) Please order Flange Kits separately from page 3.
- c) Swing Clamp Arm, four Wrench Flats and Magnetic Piston are included as standard at no extra charge. Competition charges extra for these essential features!

SC 25 x 20 R

Series	Bore (mm)	Straight Stroke (mm)	Direction of Swing when retracting	Ports
	ø12, ø16, ø20 ø25, ø32, ø40 ø50, ø63	10: ø12 - ø40 20: ø12 - ø63 50: ø50, ø63	R - Clockwise L - Counter Clockwise	Blank = NPT P = BSP Taper

Precautions

1) Vertical (rod up or rod down) applications only. **2)** Swing portion of stroke is only to be used to align a clamp arm to the workpiece. Do not attempt to use the swing stroke to apply forces to the work piece. **3)** Make certain the cylinder applies loads only in the straight portion of stroke, the loaded surface of the workpiece is perpendicular to the clamp cylinder axis and that the workpiece will not move to create a rotational force when clamped. **4)** Clamp Arm Attachments: When removing or attaching the clamp arm, brace the arm with a wrench or hold it steady in a vise. Not doing so may damage the internal parts of the clamp cylinder. **5)** Operating Pressure: Max. operating pressure should be determined based on Dim. “X” of either standard or custom length clamp arm. **6)** Piston / Clamp Speed: Use flow control valves to limit piston speed to not greater than limits shown.

STANDARD FEATURES (for which the competition charges extra)!!!

- Magnetic Piston • Clamp arm with adjusting clamp bolt • 4 rod end flats for clamp arm positioning

Mounting Flange

Mounting flange & fastener kit to provide alternative mounting and port orientation to a rectangular pattern. Please order kits separately from the table below.

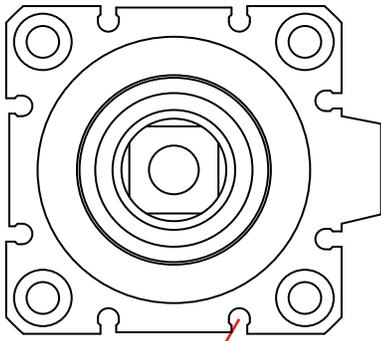

Model	Dimensions						Mounting Kit	
	FD	FT	FY	FX	FV	FZ	ØJ	ØT
SC20	6.3	8	25.5	48	38	60	6.6	13

Magnetically Actuated Sensors –

Magnetic Piston is a standard feature of Fabco-Air swing clamp cylinders. When position sensing is desired for input to signal controllers, Fabco-Air sensors mount easily and securely inslots on the cylinder body.

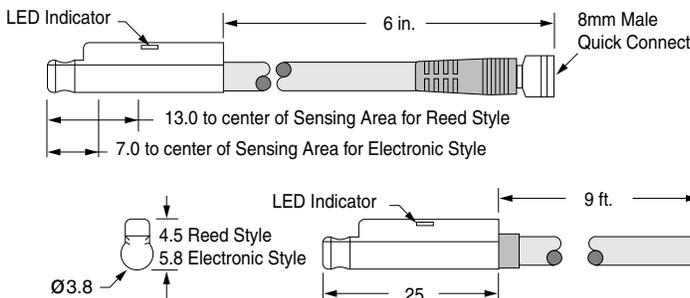

4mm keyhole slots for mounting (sensors shown on ø63 bore – 8 places)

Rod end view showing 4mm keyhole slots on a ø32 bore clamp cylinder

Sensor Dimensions (mm unless noted)

All sensors feature surge suppression, polarity protection, LED indicator, and extremely fast switching speeds.

Round Profile Sensors feature surge suppression, polarity protection, LED indicator, and extremely fast switching speeds. They slide into mating 4mm keyhole slots on either side of the cylinder block and are easily positioned and locked in place with a set screw. They are offered in two styles: a quick connect style with a 6 inch pigtail and male connector, or a prewired style with a 9 foot lead.

Female Cordsets are available in 3 pin configuration in 2 and 5 meter lengths.

Order sensors and cordsets separately from the tables below.

Prewired sensor shown with 9 ft. lead

3 pin cordset shown with sensor pigtail

8mm Female Cordsets for Quick Connect Sensors

Cordset Description	Part No.
2 meters, 3-Pin	CFC-2M
5 meters, 3-Pin	CFC-5M

Magnetic Sensors – Electrical Characteristics

Sensor Type	Function	Switching Voltage	Switching Current	Switching Power	Switching Speed	Voltage Drop
Reed Switch for PLC's w/LED (current limiting)	SPST Normally Open	5-120V AC/DC 50/60 Hz	0.04 Amp max 0.005 Amp min.	4 Watts max.	0.5 ms operate 0.1 ms release	2.5 Volts
Electronic LED and Sourcing	PNP Normally Open	6-30 VDC	0.2 Amp max.	6 Watts max.	1.5µs operate 0.5µs release	1.5 Volts
Electronic LED and Sinking	NPN Normally Open	6-30 VDC	0.2 Amp max.	6 Watts max.	1.5µs operate 0.5µs release	1.5 Volts
